

Memory AI

Your external brain.

Capture every thought. Find anything. Stay ahead.

The problem

Knowledge lives in your head, not in your tools.

70%

of what you discuss is forgotten within 24 hours

0

context when you return to a project after a week

?

which decision was made and why - hard to trace

What is Memory AI

A personal memory layer that records, transcribes, links, and surfaces knowledge exactly when you need it.

1

01

Record

Speak freely. Memory AI captures every word from voice, notes, meetings.

2

02

Transcribe & Link

AI converts speech to text, extracts tasks, links to related knowledge.

3

03

Surface & Act

Get briefings before meetings. Recall anything instantly. Stay ahead.

Everything you need to remember everything.

Voice Recording

Up to 1h/day free. Unlimited in Pro. Hands-free capture.

Smart Search

Semantic search across notes, sessions, and KB in one place.

Notes & Graph

Linked notes with visual backlink graph and knowledge map.

Knowledge Base

Structured articles, categories, AI hints from recordings.

Task Extraction

Automatic action items from every recording.

Calendar

All your notes and tasks connected to time.

AI works before, during, and after every session.

01

Pre-session Briefing

Relevant notes, open tasks, and past decisions surface automatically.

02

Record Session

Voice captured, every word.
Hands-free.

03

AI Transcription + Summary

Full transcript, key points, decisions extracted.

04

Post-session Digest

What was captured, linked, added to your KB.

USE CASE

Before the meeting

Memory AI surfaces what matters before you even open your laptop.

- Relevant notes from last quarter
- Open tasks from the project
- Decisions made in previous meetings
- Key contacts and context

Memory surfaces automatically

Before your 10:00 AM call

Note

Q1 roadmap decisions - March 12

Task

3 open action items from last call

KB

Product strategy article - updated

Note

Artem: priorities for H1 2026

USE CASE

After the meeting

Every word captured.
Every decision recorded.
Nothing lost.

- Transcript ready in seconds
- 5 tasks extracted automatically
- 2 KB article hints generated
- Session summary in your notes

Post-session digest

Meeting: Product review - June 9, 2026

SUMMARY

Key points: pricing model, onboarding flow, Q3 targets.

TASKS

Finish pricing page, update FAQ, prepare deck by June 15.

KB HINTS

Consider adding 'Pricing rationale' article to your KB.

Smart Search

Ask in natural language. Get results from notes, sessions, and KB all at once.

What did we decide about the pricing in March?

SESSION

Mar 14 call - Pricing discussion

Decided: EUR 10 Pro plan, free tier 1h/day.

NOTE

Pricing notes - March 12

Competitor analysis. Value-based model.

KB

Pricing rationale

Why per-seat monthly over usage billing.

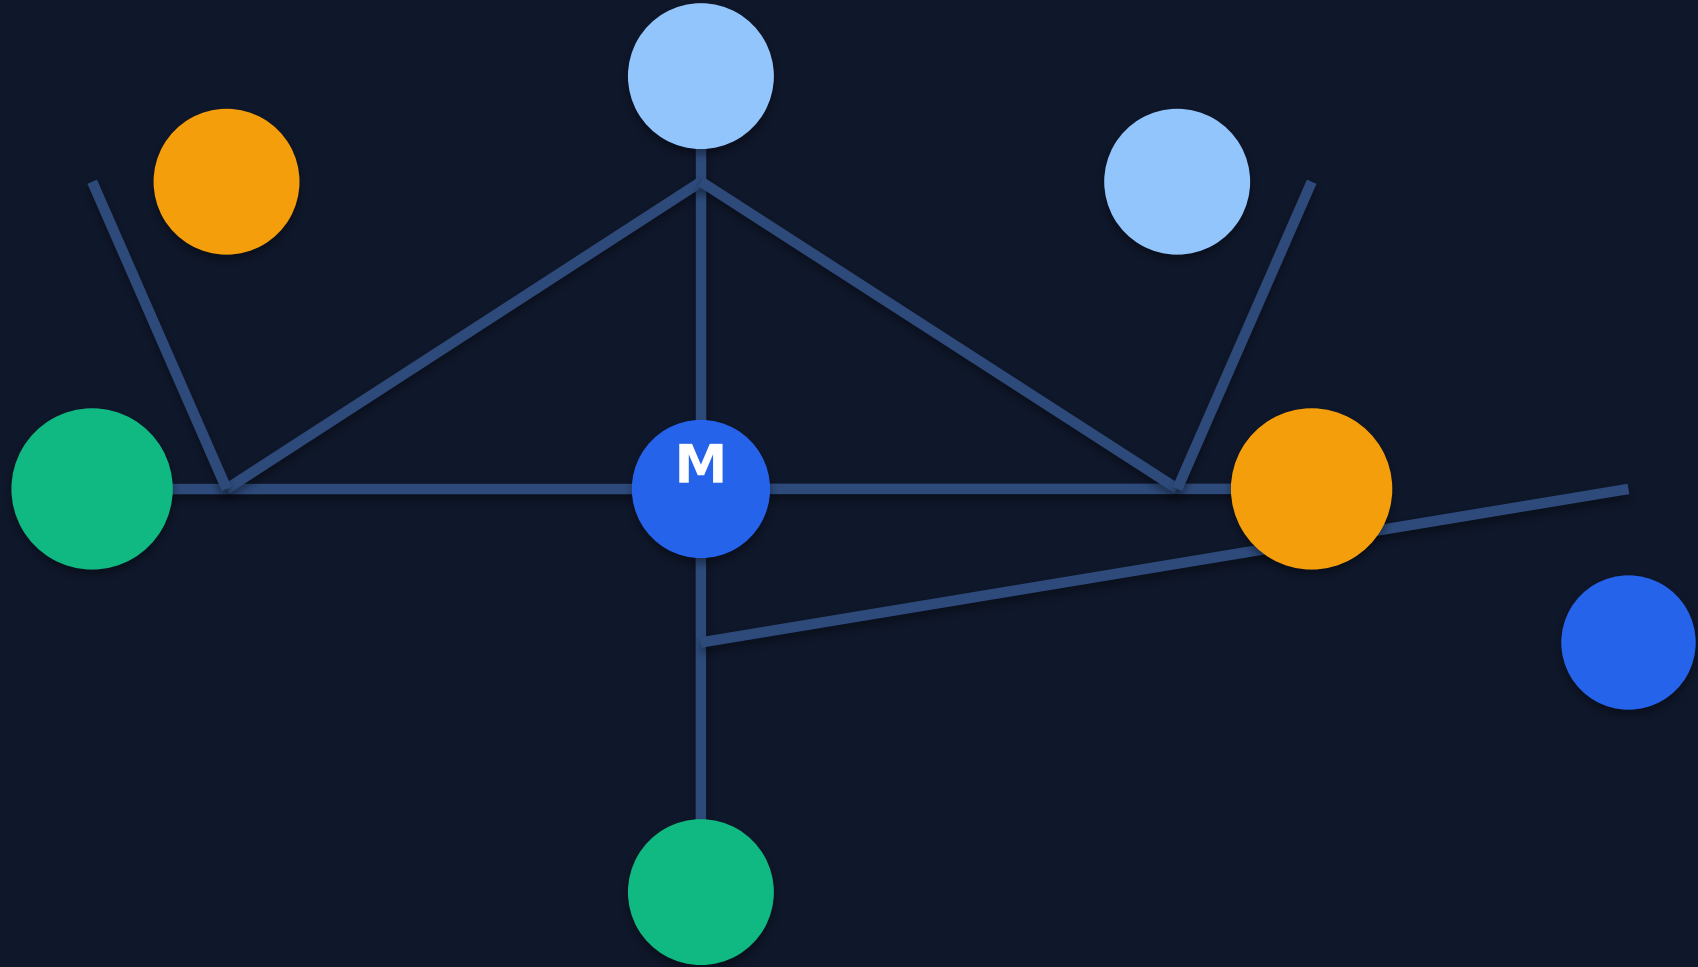

TASK

Update pricing page - completed

Assigned June 9. Deployed to production.

Knowledge Graph

Every note connects. See relationships between ideas, people, and projects.
